

Make things better.

The molecule is what
you make of it.

THE IMPACT

Manufacturing one litre of Entropy Resins epoxy with Super Sap technology saves over the industry average:

Energy saved - charging 350 smartphones

Water saved - 20 (500ml) servings of water

Pollution saved - driving 5 kilometres in a car

1 Litre of Entropy Resin Saves

20
servings of
water*
(500ml)

350
smartphone
charges of
energy*

5
kilometres
of car
pollution*

* over industry standard manufacturing processes

20
servings of
water saved*
(500ml;)

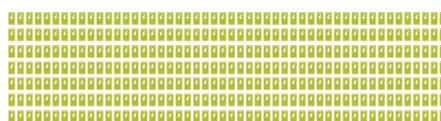

* over industry standard
manufacturing processes for one
litre of epoxy resin.

5
kilometres of car
pollution
saved*

* over industry standard manufacturing
processes for one litre of epoxy resin.

350
smartphone charges of
energy saved*

* over industry standard manufacturing processes for one
gallon of epoxy resin.

Our customers can evaluate the benefits of bio-based epoxy systems and how they affect the environment by viewing the full report on entropyresins.com
